Portfolio Samples – Joseph S. Dooley

Below are links to content that is hosted publicly. Unfortunately, most of my work is owned by the companies that I have written for and not public. I do not share the private works, often at the request of the owner.

Link 16 was put together extremely fast for Audible/Amazon to display knowledge of APIs. The Audible/Amazon project was to overhaul and create their RESTful API reference manual in order to share it with outside companies (mostly the auto industry).

All the functional code from all the below content is mine. To display some more technical abilities, article 15 is a Python-based project. For an interesting graphical flow chart, article 7 describes a possible git and GitHub workflow. To display a smooth writing style, articles 2 or 1 are less technical.

Link 17 is from my recent position with LogicMonitor (their site can be unstable).

1) CBS Philly:
"Philadelphia Tech Company Shares Online Educational Content With The World"
http://philadelphia.cbslocal.com/2015/02/02/philadelphia-tech-company-shares-online-educational-content-with-the-world/

The following 14 articles were for Linode:

2) "Content Management Systems: an Overview"
Current article:
https://www.linode.com/docs/websites/cms/cms-overview
My original GitHub pull request:
https://github.com/linode/docs/blob/0b595124094a0315dcc73d090eb50d8f8afd91e5/docs/websites/cms/cms-overview.md

3) "Managing Web Content with Drupal 8 Beta"
Current article is deprecated.
My original GitHub pull request:
https://github.com/linode/docs/blob/752484707b96f225c691e0bda5dc2cf06cec7faa/docs/websites/cms/managing-web-content-with-drupal-8-beta.md

4) "Installing and Using Drupal Drush"
Current Article:
https://www.linode.com/docs/websites/cms/drush-drupal
My original GitHub pull request:
https://github.com/linode/docs/blob/b9f5983b2e3268f3fd012d9f8e2a7ba97e4f4886/docs/websites/cms/drush-drupal.md

5) "Themes, Modules, & Backups with Drupal Drush on Debian 7"
Current article:
https://www.linode.com/docs/websites/cms/themes-modules-backups-drupal-drush-on-debian-7
My original GitHub pull request:
https://github.com/linode/docs/blob/6c777b4e4635ff51d04a6317ecd9a68288820897/docs/websites/cms/themes-modules-backups-drupal-drush-on-debian-7.md

6) "Markdown Quick Reference"
Current article is deprecated.
My original GitHub pull request:
https://github.com/linode/docs/blob/6c777b4e4635ff51d04a6317ecd9a68288820897/docs/tools-reference/tools/markdown-quick-reference.md

7) "Developing with Git and GitHub for Beginners"
Current Article:
https://www.linode.com/docs/applications/development/developing-git-github
My original GitHub pull request:
https://github.com/linode/docs/blob/6c777b4e4635ff51d04a6317ecd9a68288820897/docs/applications/development/developing-git-github.md

8) "Using Node.js with NGINX on Debian"
Current article:
https://www.linode.com/docs/websites/nodejs/how-to-install-nodejs-and-nginx-on-debian
My original GitHub pull request:
https://github.com/linode/docs/blob/6c777b4e4635ff51d04a6317ecd9a68288820897/docs/websites/nodejs/nodejs-nginx-debian.md

9) "Install Node.js"
Current article is deprecated.
My original GitHub pull request:
https://github.com/linode/docs/blob/6c777b4e4635ff51d04a6317ecd9a68288820897/docs/websites/nodejs/installing-nodejs.md

10) "LAMP Stack with Docker"
Current article:
https://www.linode.com/docs/applications/containers/how-to-install-docker-and-deploy-a-lamp-stack
My original GitHub pull request:
https://github.com/linode/docs/blob/6c777b4e4635ff51d04a6317ecd9a68288820897/docs/applications/containers/linode-lamp-container-docker.md

11) "Basic Node.js Web Server with Docker"
Current article:
https://www.linode.com/docs/applications/containers/node-js-web-server-deployed-within-docker
My original GitHub pull request:
https://github.com/linode/docs/blob/6c777b4e4635ff51d04a6317ecd9a68288820897/docs/applications/containers/nodejs-node-js-web-server-docker-container.md

12) "Docker Quick Reference"
Current Article:
https://www.linode.com/docs/applications/containers/docker-quick-reference-cheat-sheet
My original GitHub pull request:
https://github.com/linode/docs/blob/6c777b4e4635ff51d04a6317ecd9a68288820897/docs/applications/containers/docker-quick-reference-cheat-sheet.md

13) "Salt States to Install Apache, MySQL, PHP (LAMP), and Fail2ban"
Current article:

https://www.linode.com/docs/applications/salt/use-salt-states-to-create-lamp-stack-and-fail2ban-across-salt-minions
My original GitHub pull request:
